North American Catalysis Society  
**20<sup>th</sup> NAM**

Meeting Dates:  
**June 17-22, 2007**

Exhibit Dates:  
**June 18-21, 2007**

**Hilton Americas Hotel  
Houston Texas, U.S.A.**

## Why Exhibit at the 20th NAM?

More than 1000 of the world's leading scientists, chemists and engineers will gather at the 20th NAM to focus on original research and advancements in the broad use of catalysts in the petroleum, chemical, pharmaceutical, energy and environmental industries.

Exhibiting at the 20th NAM will put your company in front of customers and qualified prospects, from a variety of industries, that are often difficult for sales people to reach.

The 20th NAM recognizes the importance of industrial sponsors to the field of Catalysis and has made efforts to maximize the exposure of exhibits. The Exhibit Hall will be located in close proximity to the Poster Sessions and Technical Meeting Rooms. Refreshments for Conference breaks and poster receptions will be located in the Exhibit Hall when possible.

## Additional Exhibitor Benefits:

- ▶ One full conference admission to the 20th NAM Technical Program per booth space rented
- ▶ Exhibitor Program will be included in the 20th NAM Final Program and on the 20th NAM Conference web site
- ▶ Morning and afternoon coffee breaks in the Exhibit Hall

reactors, material synthesis, experimental design, data mining and analysis.

**Novel characterization techniques:**  
spectroscopy, surface science, isotope switching, microscopy, tomography.

**New catalytic materials and supports:**  
nanotechnology, mesoporous materials, zeolites, inorganic supports

**Catalytic technology for protection of the environment:**  
emission control, use of alternate feedstocks, photocatalysis, electrocatalysis, hydrogen generation from non-carbon sources.

**Homogeneous catalysis:**  
organometallics, polymerization, biomimetics, ionic liquids and other novel reaction media, chiral synthesis.

**Catalyst deactivation, regeneration and disposition:**  
mechanisms, chemistry and processes, metal recovery, disposal of used catalysts.

**Syngas conversion:**  
GTL, GTO, CTL, BTL.

**Hydroprocessing:**  
HDS, HDN, aromatic hydrogenation.

**Heavy feed conversion:**  
FCC, hydrocracking, lubes, coal, shale oil.

**Catalysis for chemicals and specialty products:**  
olefin production, polymers, oxygenates, chiral synthesis.

**Hydrogen and syngas generation from hydrocarbons:**  
steam and autothermal reforming, partial oxidation.

**Acid-base catalysis:**  
novel reactions and applications.

**Fuel cells:**
